*Rigid & padded structure : the structure of *LE* bag BP offers a serious protection for your PowerBook™ by combining efficient rigidity with shock absorption. A vertical PE board works as a rigid spinal column, supporting your laptop and the heavily padded bottom protects the whole thing from shocks and vibrations. Both sides are padded as well to enclose all your stuff in a protective shell.

**Neoprene organizer panel : this innovative feature from Be-ez takes advantage of its unique vertical arrangement to store and organize all your accessories without jamming the bottom of your bag, saving a lot of precious space when on the go.
